Session Overview:

ObserveNow Media, in collaboration with Infiflex & Google Cloud hosted an exclusive Leadership Dialogue in Gurugram on “Future Of Work With AI”. This high-impact, closed-door session brought together C- Suites to explore the ways to drive business growth through seamless, secure, and intelligent collaboration.

As AI investments surge across India—84% of enterprises are expected to increase their AI budgets in 2025 (IBM Global AI Index 2024)—this session offered a timely platform to address how AI can be democratized within organizations to drive real business outcomes. Discussions highlighted the transition from siloed tools to integrated, intelligent solutions that not only enhance efficiency but also strengthen security and compliance frameworks.

With India’s AI market projected to reach **\$17 billion by 2027** (NASSCOM-BCG Report, 2024), leaders gathered to understand how to operationalize AI to stay ahead in a rapidly evolving digital landscape.

Curated By:

ObserveNow Media is a B2B Media Marketing & Data Intelligence company that curates high-impact, thought leadership sessions. We specialise in organising closed-door Bespoke & Large Industry Events for our clients, connecting them to their relevant TGs and showcasing their products and services in the most efficient manner.

Google Cloud is a leading cloud computing platform by Google that helps organizations of all sizes build, deploy, and scale digital solutions. Known for its strong infrastructure, AI/ML capabilities, and advanced data analytics tools, Google Cloud supports innovation across industries — enabling smarter collaboration, secure storage, and powerful computing performance.

Infiflex is a trusted cloud solutions provider and a premier partner of Google Cloud. They specialize in helping businesses modernize their IT infrastructure, adopt cloud-based collaboration tools, and implement secure, scalable, and cost-effective digital solutions. Infiflex works closely with enterprises to drive cloud transformation and unlock the full potential of Google Cloud technologies.
